Label position explanation

Due to printing technology available in bulb factory as well as bulb material and color, 6 point font should be used. If we would to place FCC ID : 2AAU7-RGBWZWUS (followed by IC: 11391A-RGBWZWUS) on top edge of bulb cooler body this would be 54mm long and almost 1/3 of full circle (103 degrees). Bulb factory do not have technology to print on 1/3 around the bulb. [even if 4 point font is used it will require 68 degrees of circle to print.]

For reasons stated above we ask you to accept placing FCC ID mark on bulb package as we proposed in submitted documentation.

Dated this 20th day of August, 2014.
